Detailed Description of what the application does

Start with the following document:

The basic purpose of our app is to register in teams for any course or whatsoever. We have designed it to register for the course COP-290 for the time being. In this document, I'll be explaining the basic purpose of each screen along with the in-built functions of our app. We have kept it like for registration for COP-290, two members are compulsory and the third member is optional. It's upto the team.

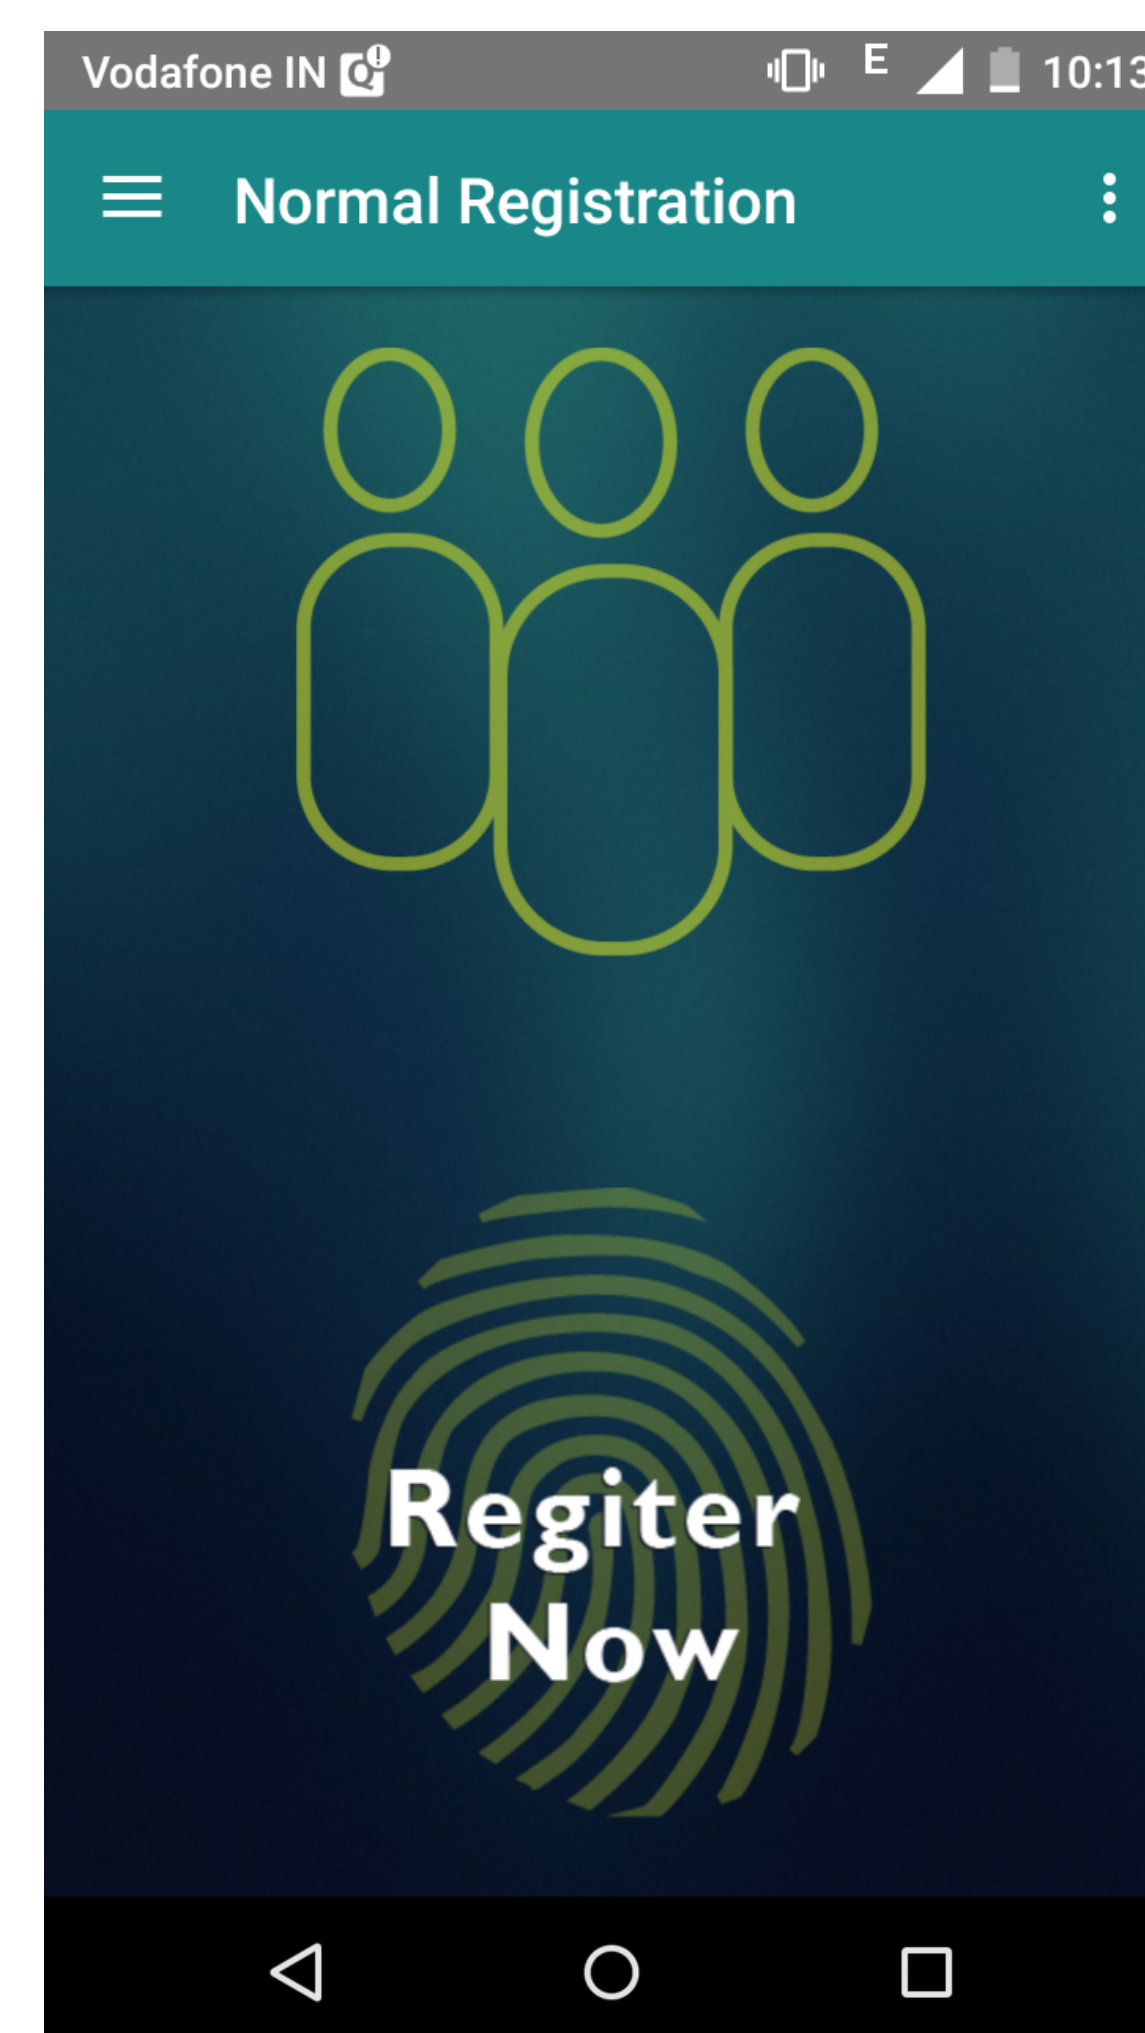

Main Screen

The screenshot shows a mobile app interface titled 'Normal Registration'. It features a form with the following fields: 'Team Name', 'Member 1' (with 'Entry No.' below it), 'Member 2' (with 'Entry No.' below it), and 'Member 3 (optional)' (with 'Entry No.' below it). A green 'LOGIN' button is at the bottom. The status bar at the top shows 'Vodafone IN' and the time '10:13'.

Introduction for the main screen:

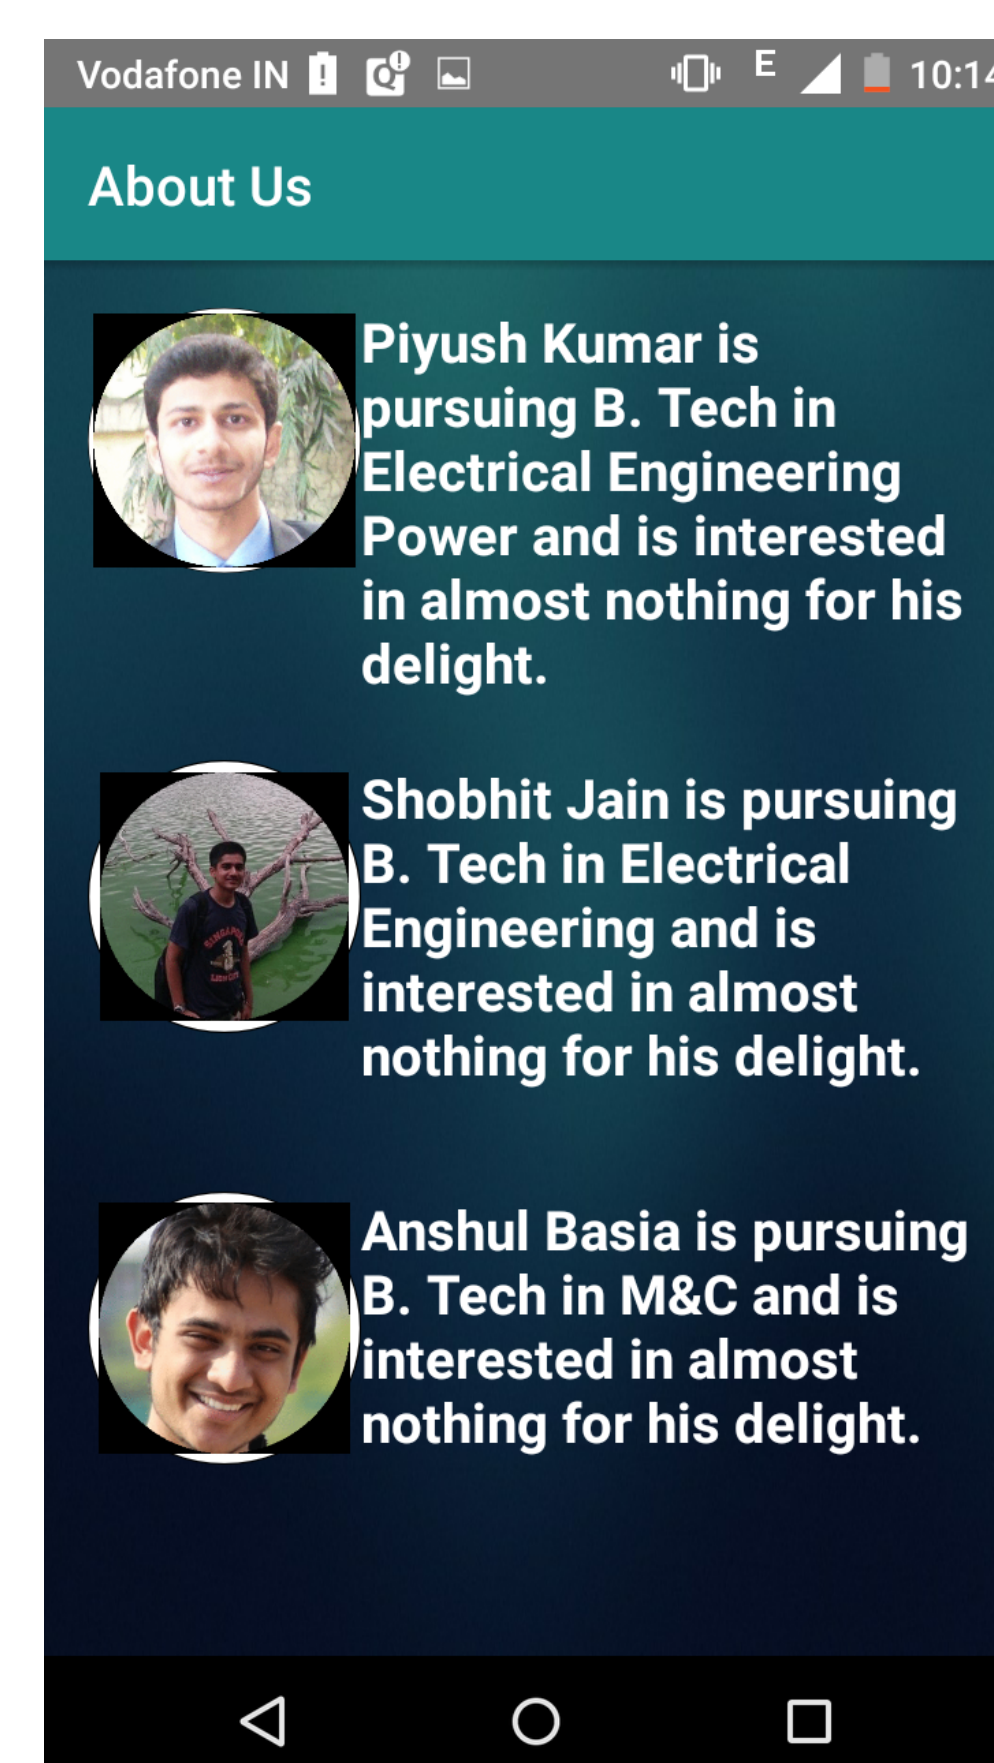

The basic layout of the screen is simple enough. It asks users to enter names and entry numbers of the team members keeping the third one optional. We have put up several validation checks on name format and on standard format for entry no. It'll show an error message and will not accept if given in wrong format. When clicked on login, information is sent to server to process.

Registration Screen

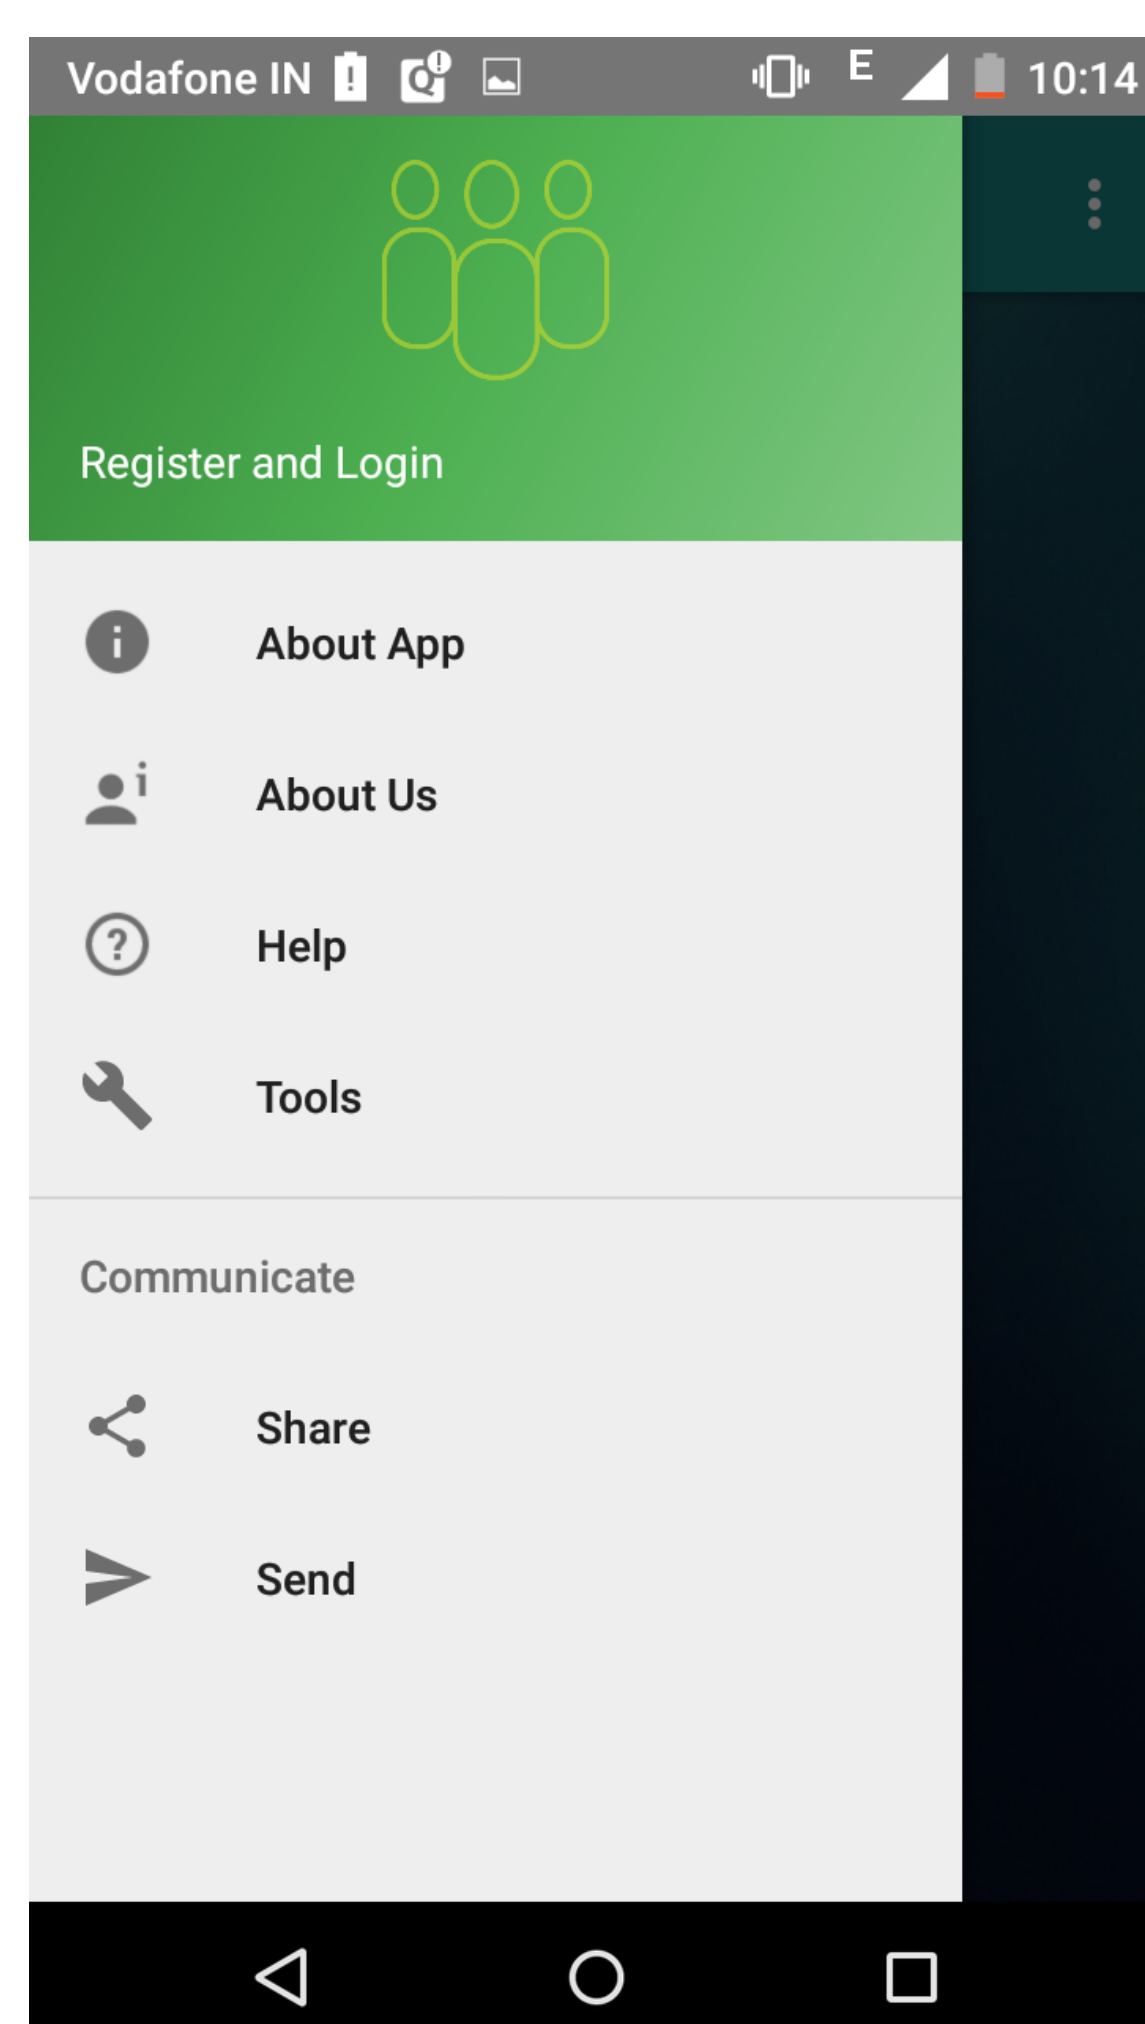

Happy Registrations:
Tap on the finger print and it'll take you to the screen where you can register you and your team for COP 290.

About US

Information:
A screen for the information of those who have worked day and night to build this for you.

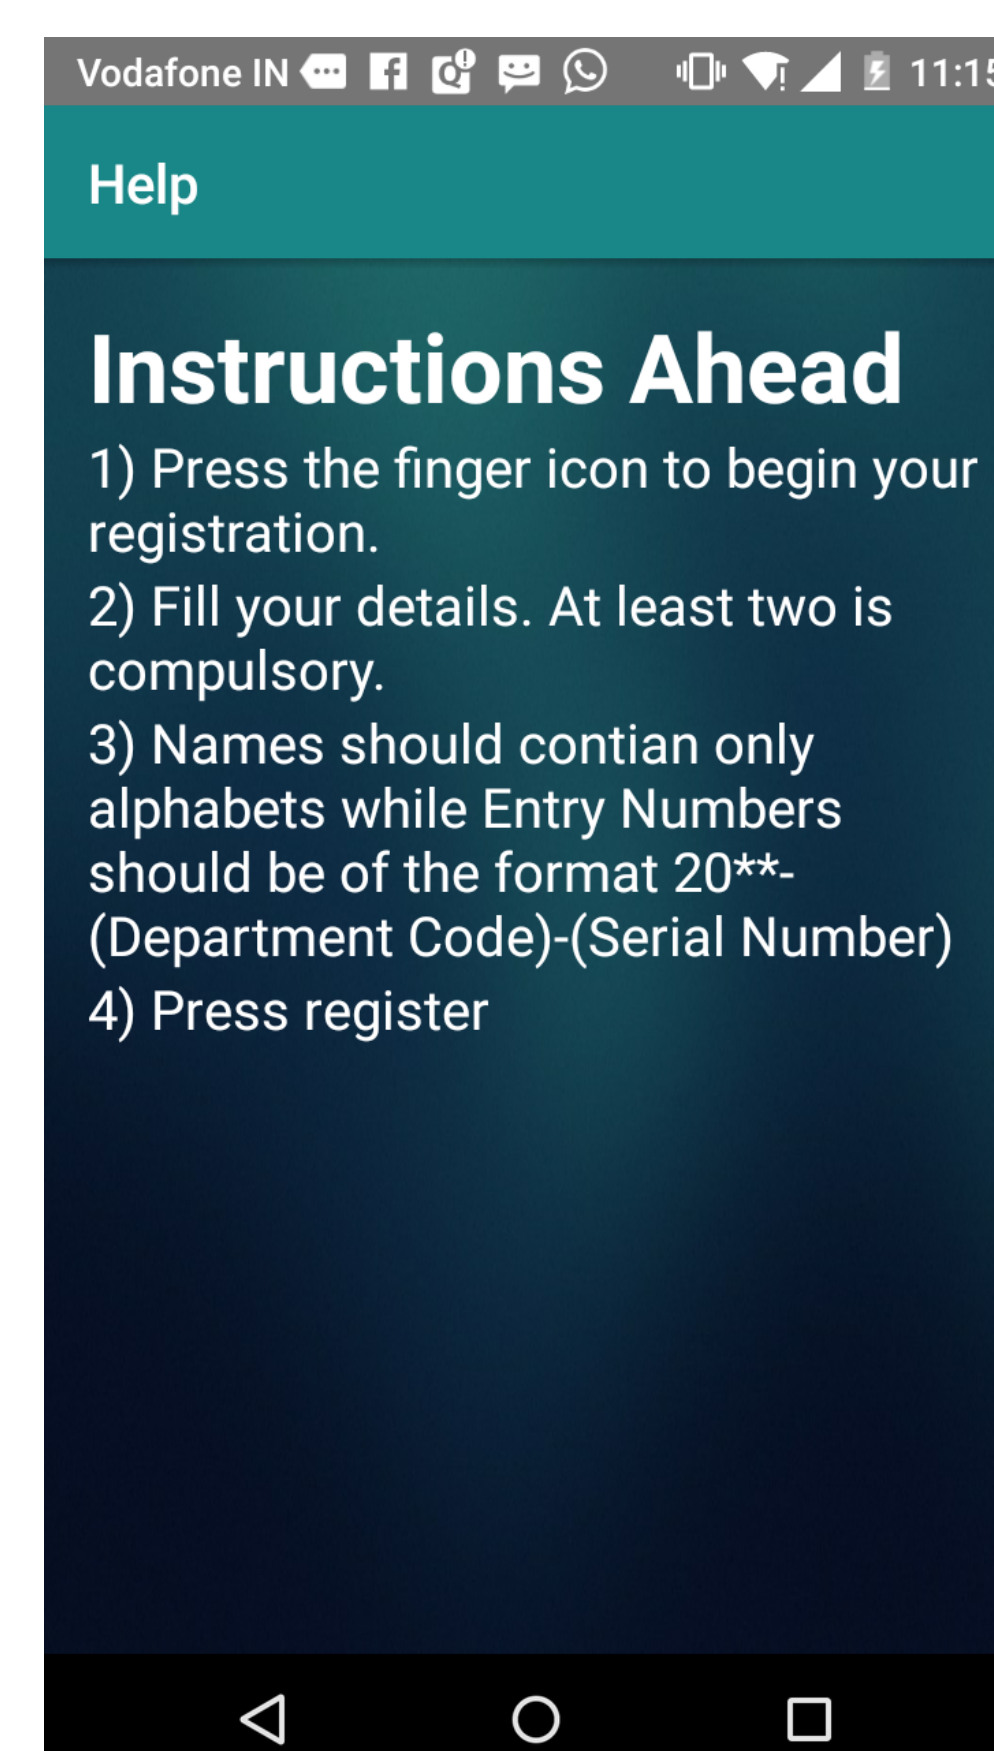

Menu

Side Swipe Menu:

When user swipes right after the first screen, the menu given alongside will appear asking for various options that user might wants to do. We have used a standard menu items which can further be modified as required by the task.

Help

Help for users
Instructions to use this app to the fullest. In case user has any doubt, how to proceed, he can refer to this part of the app.
